

With over more than 5000 dealers,

KAG Tiles has made its presence as the market leader of Tiles in South India and also uniquely into the overseas market by exporting to around 10 countries in the Middle East and South America.

To fulfill the expectations of viewing the exact real effects of tiles on wall and floor, TilesView and KAG initiated their journey for better and uncommon ways of visuals which resulted in an amazing growth in customer satisfaction. With respect to knowing what actual customers are looking for, during their decision to buy tiles, Tilesview provided an exact answer by explaining the unique features involved in its Visualizer, which are.

User-Friendly and Easy to Render:

As per the reports from KAG team, the tool has been delivering a user-friendly interface that helps the customers to render tiles on the wall and floor easily, and has helped them visualize what they are actually imagining.

Instant E-Catalogue Feature:

The tool has an amazing feature of creating the catalogue instantly; once they render tiles. It helps the business to create those catalogues which the clients are wanting to buy.

Minute Elements of the Visualizer:

Elements that actually add value to the view have been satisfying the customer mindset since a long time and still continuing. Enlisting a few of them,

- Reflection feature - Pattern Image - Tile Calculator
- Grout Thickness - Tile Rotation

30 Minutes Integration:

KAG got its Tilesview integration in mere time of 15-25 minutes which has so far helped them deliver an unmatched scope of creating instant catalogues and helping users visualize stunning tiles throughout India and overseas.

Growth & Upgrade

With the help of these extraordinary features, KAG has managed to move ahead with new users across India and Abroad. KAG is one of the largest wall and floor tile manufacturers in India which has been into the market for the last 25 years, with more than 2500 designs of tiles and 100 exclusive showrooms.

It has been a long time since KAG and TilesView have got along, whereas TilesView has been active in more than other than India. It has its network with major Tiles Businesses, which includes manufacturers, distributors, importers, exporters, wholesalers, retailers, contractors and dealers of tiles. Considering the feedback and suggestions of our clients and prospects, we have been aiming to broaden our business network to enhance modernization in the Tile Industry.

KAG India : Powered By TilesView

Welcome to TilesView, the new, simple, and smart way to visualize tiles. The world's innovative tile visualizer application that helps you bring your ideas for tiling your walls and floors to beautiful reality. We know it can be challenging to imagine a fully-finished room just by gazing at any piece of tile, marble, or mosaic. Since we understand it can be tough to visualize how your chosen tiles might look in your residential or office space, we have created our inspirational tile visualizer.
